SUMMARY

As a Computer System engineer with hands-on experience in JavaScript, Node.js, and Database management, I have honed my backend development skills through rigorous training programs and internships. My recent engagement as Backend Developer Trainee at Tap-Talent Acceleration Program, has further strengthened my understanding of server-side programming. Seeking entry-level Backend Developer position to leverage these skills and contribute towards efficient system solutions.

EXPERIENCE

Backend Developer

Tap-Talent Acceleration Program

11/2023 - 02/2023 Palestine

- Completed an intensive backend development course as part of the Tap-Talent Acceleration Program, where I gained hands-on experience and proficiency in Node.js, Express, MySQL, and Sequelize.
- Successfully executed multiple projects during the course, showcasing practical application and problem-solving skills. Additionally, collaborated with a team of five using GitHub to work on a substantial project, enhancing my teamwork and version control abilities.

TRAINING / COURSES

MySQL

Node.js

React

Android Studio

EDUCATION

Bachelor's degree in Computer System Engineering

Birzeit University, Ramallah

- While enrolled at Birzeit University, I completed several courses focused on backend development, including Database Administration. These courses involved hands-on experience with MySQL databases and SQL language.

PROJECTS

E-Commerce Website Collaboration

- Utilized technologies such as Node.js. Implemented key features including product catalog, user authentication, and secure payment gateways.
- Successfully collaborated using version control with Git and GitHub to ensure a streamlined workflow within the team.

Books Library Management System

- Implemented features for adding, updating, and deleting books, enhancing the functionality of the system.
- Integrated a database using MySQL to store book information efficiently.

SKILLS

Version Control:

Git

Backend Development

Node.js

Database Design

MySQL

Express.js

Data Structures and Algorithms:

Arrays

Linked Lists

Stacks

Queues

Programming Languages:

JavaScript

Matlab

Computer Networks:

Security Protocols

Web Servers

API Development

ADDITIONAL EXPERIENCE

Arduino

Laboo

01/2019 - 03/2019 Birzeit

- Troubleshoot and resolved hardware-software compatibility issues, ensuring the smooth operation of IoT devices.

Frontend Development

KnowledgeAcademy

09/2021 - 01/2022 remote

A Frontend course

KnowledgeAcademy.

- Covered topics such as HTML, JavaScript, Bootstrap, Ajax, JSON, jQuery, and Angular.

LANGUAGES
